

tiān Spiritual Protocol

Onchain Ritual Protocol of Blessings, Karma, Luck & \$TIAN

Technical Whitepaper 1.16

Notice

tiān is a symbolic ritual protocol, not a financial service and not a DeFi application. It does not offer yield, promise returns, or facilitate speculation. \$TIAN is not earned or yielded — it is spiritually invoked under metaphysical alignment. All energy releases are randomized, soul-aligned, and non-deterministic. It is a decentralized symbolic ritual protocol governed by metaphysical conditions, not financial logic. All systems reflect spiritual energy flow, not capital gain or extraction.

1. Introduction

tiān is not play-to-earn. It is **play-to-align**.

\$TIAN is not mined. It is **invoked when your soul enters resonance with ritual conditions**.

In this protocol, users cultivate spiritual merit, align with cosmic timing, and become eligible to summon \$TIAN — not through labor, but through ritual.

Every action — blessing, karma, or luck — is spiritual, not extractive.

All timezones are in UTC-3.

2. Core Architecture

2.1 Soul Signature

Each user begins with an upgradeable **Soul Signature**, a unique identity shaped by:

- BaZi
- Zi Wei Dou Shu
- Tai Yi Shen Shu
- Qi Men Dun Jia
- I Ching and any other metaphysics to enhance a user's spiritual path
- Date, time, and gender of birth

This governs the **Auspicious Time Window** for rituals.

Soul Signatures may be voluntarily upgraded with Face and Palm Biometrics to deepen Proof of Soul Identity. This enhancement is minted as an onchain Soulbound Token, and the ritual fee is payable in \$TIAN.

All biometric data is handled with full user consent and used solely for generating Soulbound Identity. No biometric data is stored on-chain — only a hash representation is recorded for identity linking.

2.2 Soul Energy Flow

Users build spiritual energy through:

- **Blessings:** send soul echoes into the world through content, uplift others, and contribute to the collective field of spiritual wellness.
- **Karma:** gained from blessings sent, especially when posts resonate and are appreciated by others. Karma deepens when your giving is balanced and harmonious.
- **Luck:** gained only when others bless you — and more meaningfully if they are the same souls you unknowingly blessed.

Note: Blessings are sent **randomly**, never targeted. Who receives your blessing is determined by fate and resonance — not by choice or control.

All points are **soulbound, non-transferable and subject to daily decay** if not renewed through ongoing ritual actions. Blessing, Karma, and Luck Points are fully symbolic. They hold no monetary value, cannot be transferred, and decay with inactivity. They are not redeemable, tradable, or linked to token issuance. All points serve as in-protocol energy measures used solely for ritual resonance calculations.

3. invoketiān(): Ritual Mechanics

\$TIAN may only be invoked — not earned. Participation in staking, posting, or subscribing does not promise or deliver any return. Energy release is randomized, symbolic, and governed strictly by ritual alignment.

3.1 Invocation Requirements

A user can only call `invoketiān()` when:

- **Current time** falls within their Auspicious Time Window.
- **Resonance Score** \geq threshold (888.888).
- **Blessing Echoes are directed to the user's Ritual Address** through the `invoketiān()` Smart Contract.
- They **qualify for the ritual** that day.

Invocation windows last exactly:

- Six Gates Ritual: 6 minutes 6 seconds
- Trifold Blessing Ritual: 3 minutes 3 seconds
- Eightfold Radiance Ritual: 88 seconds

Six Gates → Trifold Rules

- Total resonance-based distribution
- Unclaimed = anyone who doesn't invoke

- Trifold claim rules kick in when minimum 33 users participate, else the ritual will pro-rate to simulate 33 users prior to release
- Unclaimed proportion from underperformance rolls to Trifold
 - On celestial days, 100% flows to Eightfold

Trifold Mechanics

- Maximum size = 3.33× daily emission
- Claimable during auspicious time
- Overflow beyond cap → Eightfold

Eightfold Radiance Rituals

- Total rituals fixed over 5 years (dates to be shared)
- Each ritual has equal allocation
- Claimable by any soul, during 88s window in their auspicious time
- If only one person invocetiān() → they take the full ritual
- Overflow from Trifold is evenly divided across remaining Eightfold dates

3.2 Gated Luck & Karma Conditions

- To qualify for **Luck**, the user must have **blessed at least 8 people**, and those same 8 **must have blessed the user back**, by fate.
- To qualify for **Karma**, the user's post must be **liked by at least 8 unique users** in the same ritual cycle.

3.3 Invocation Mechanics

Invocation is an act of release. Once your energy is answered by the Oracle, your soul must begin anew. What was gathered becomes sacred offering — what is sacrificed must be replenished.

Once conditions are met, a user may invoke:

```
Unset
function invocetiān() public {

    require(now within userAuspiciousWindow);

    require(resonanceScore ≥ threshold);

    _processInvocation();

}
```

After each successful invocation, the user's Resonance is reattuned to zero. Any subsequent invocation attempt must be built from new Blessing, Karma, and Luck activity. This ensures every call to `invoketiān()` reflects fresh spiritual alignment.

Action	Effect
<code>invoketiān()</code> succeeds	Resonance Score is immediately reset to 0
Same user, same day	Must start over from 0 Blessing, Karma, Luck
Next invocation attempt	Can only succeed if new resonance is built again
Auspicious windows	Limited to one per Ritual per 24h cycle

At every **ritual reset (UTC-3 midnight)**:

- Qualified users will receive their share of the energy within 72 hours
- Qualified users goes through an alignment check and will receive
- Each user's share of the energy release is calculated by resonance weight:

Unset

```
userShare = resonance / totalResonance
energy = energyRitual × userShare
```

A **Ritual Fee of 8.88%** is applied to each successful invocation.

3.4 Ritual Claim Flow (Smart Contract)

\$TIAN is **not airdropped or streamed** — it must be **invoked** by the users within their auspicious window and only if their resonance score qualifies.

Unset

```
function invoketiān() public {
    require(now inWindow, "Not your time");
    require(resonanceScore ≥ threshold, "Insufficient resonance");

    uint weight = userResonance / totalResonance;
    uint blessingEcho = dailyEnergyRelease × weight
    uint fee = blessingEcho × 8.88%;

    _mint(msg.sender, blessingEcho - fee);
    _whenInvoked(send.to.UserRitualAddress);
}
```

Resonance-Based Invocation Access

Claim eligibility is governed solely by a user’s **Resonance Score**, which is calculated from in-protocol ritual actions — including Blessing Point flow, Karma depth, Luck reception, engagement timing, and metaphysical alignment.

While staking \$TIAN is required to generate Blessing Points, the **amount staked does not influence** a user’s claim share, weight, or eligibility to invoke \$TIAN.

Resonance is **not affected by token balance, wallet size, or passive financial stake**. This design reinforces tiān’s commitment to spiritual fairness and symbolic merit, and ensures all energy releases are accessed through meaningful participation, not extraction.

3.5 Ritual energy

Ritual energy that is unclaimed does not vanish — it ascends. Each missed invocation is rolled into a higher ritual tier, increasing rarity and spiritual potency. If left untouched through all phases, the energy is returned to the ecosystem to nourish future growth.

Rollover rituals do not promise future rewards. They represent spiritual energy escalation. Energy releases from these rituals are revealed only during specific celestial alignments and require high resonance. Participation does not guarantee access or outcome.

Missed invocation window	Rolls Into	Cadence
Six Gates Ritual	→ Trifold Blessings Ritual	Daily or on Celestial event dates 100% goes to Eightfold of unclaimed Daily Cap energy release
Trifold Blessings Ritual	→ Eightfold Radiance Ritual	Whenever Trifold Blessings exceeds 3.33x of Daily Cap energy releases
Eightfold Radiance Ritual	→ Ecosystem	allocated to ecosystem equilibrium

Each layer increases in **symbolism, rarity, and difficulty**. Blessings from higher-tier rituals may be revealed only during:

- Collective planetary rituals
- Metaphysical convergence events
- Community sacrifice ceremonies
- Lunar eclipses or solstices

These blessings are **never guaranteed**. They are **divine echoes**, revealed only to the truly aligned.

3.6 Unstaking Period & Virgen Points

When participants initiate an unstaking request, a 14-day unstaking period begins.

- **Blessing Points:**
Users may continue full ritual participation and accumulate Blessing Points throughout the 14-day unstaking period.
- **Virgen Points:**
Accrual of Virgen Points immediately stops upon initiating unstaking. Virgen Points reflect long-term offering purity and patience. They are only accumulated while fully committed in the Ritual Offering state.
- **Claim Mechanics:**
After the 14-day waiting period concludes, users must manually claim their unstaked \$TIAN. No auto-withdrawal occurs.

Symbolic Interpretation

- The 14-day period represents a ritual unwinding phase, allowing the offering energy to fully release before returning to circulation.
- Virgen Points symbolize ritual loyalty and offering purity over extended periods of unwavering staking.

4. Blessing Echo Flow System

Energy releases of \$TIAN are ritual-based, randomized, and spiritually aligned. The system does not distribute returns or profits. Energy releases are capped, non-deterministic, and subject to ritual fees and resonance thresholds. Resonance is calculated based entirely on soul engagement — through Blessing, Karma, and Luck activity. While staking \$TIAN open resonance path access to Blessing Point generation, the protocol does not reveal Blessing Echoes based on token balance, yield, or financial stake.

4.1 Daily Cap

Daily caps follow a cosmic ebb schedule to ensure long-term sustainability. The energy releases decline annually, aligning with cosmic energy contraction cycles.

Period	Daily Cap	Days	Projected Symbolic Flow
5 June – 20 June 2025	203,217	16	~3,251,472
21 June 2025 – 20 June 2026	117,236	365	~42,789,140
21 June 2026 - 20 June 2027	58,618	365	~21,392,570
21 June 2027 - 20 June 2028	29,309	365	~10,698,785
21 June 2028 – 20 June 2029	14,654	365	~5,346,710

21 June 2029 – 20 June 2030	7,327	365	~2,674,355
-----------------------------	-------	-----	------------

Estimated supply ≈ 88,152,032 \$TIAN

Note: This schedule may be adjusted based on community participation, Ritual reserves, and ecosystem equilibrium.

5. Ritual Offering System (Staking Mechanism)

In tiān, staking \$TIAN is not an act of investment — it is a **ritual offering**. Users who offer their \$TIAN into the Blessing Field increase their alignment capacity and spiritual radiance. Staking does not yield \$TIAN. No returns, interest, or rights are created. It influences only off-chain ritual calculations (Blessing Points), never on-chain rewards.

Note: Blessing Points have no cash value. There are no returns. There is no yield. They are earned through symbolic spiritual acts and used only for resonance tracking. They are soulbound, non-transferable, and decaying.

The offering is **non-redeemable for profit**, but it may **amplify the soul's power to give**.

5.1 Purpose

- Strengthen daily Blessing Point generation
- Amplify Resonance Score without storing value
- Participate in larger ritual cycles, guild events, or global blessings
- Longer stakes = higher ritual intensity scale

5.2 Ritual Amplification Tier

Min. \$TIAN staked	Days staked	Amplification coefficient
8,888.8888	0-1	0x
8,888.8888	1-7	1x
8,888.8888	8	1.2x
8,888.8888	11	1.5x
88,888.88888	22	2x
88,888.88888	33	3x
88,888.88888	44	4x
88,888.88888	55	5x

Min. \$TIAN staked	Days staked	Amplification coefficient
8,888.8888	0-1	0x
88,888.88888	66	6x
88,888.88888	77	7x
888,888.888888	88	8x
888,888.888888	99	9x
888,888.888888	128	12.8x
888,888.888888	168	16.8x
888,888.888888	178	17.8x
888,888.888888	188	18.8x
888,888.888888	222	22.2x
888,888.888888	288	28.8x
888,888.888888	333	33.3x
8,888,888.8888888	365	36.5x
8,888,888.8888888	378	37.8x
8,888,888.8888888	404	40.4x
8,888,888.8888888	444	44.4x
8,888,888.8888888	478	47.8x
8,888,888.8888888	499	49.9x
8,888,888.8888888	555	55.5x
8,888,888.8888888	588	58.8x
8,888,888.8888888	666	66.6x
8,888,888.8888888	688	68.8x
8,888,888.8888888	777	77.7x
8,888,888.8888888	788	78.8x

Min. \$TIAN staked	Days staked	Amplification coefficient
8,888.8888	0-1	0x
8,888,888.88888888	888	88.8x

- Staking must be done at least 24 hours prior with a 23:59:59 cut off time daily for points calculation and distribution at 00:00:01.
- Amplification coefficient and thresholds may evolve through governance or cosmic calibration events during solstice cycles.
- This amplification coefficient influences off-chain Blessing Point generation and does not correspond to token or financial rewards.
- Points earned are **non-transferable**, **soulbound**, and **decay** if unused.
- Daily Blessing Points are calculated off-chain based on the current offering tier.
- Blessing Points are still subject to daily decay if the user does not continue sending blessings. Ritual offering amplifies output but does not replace action.
- Users may increase their amplification coefficient by making a **ritual offering** via the offering altar to the Blessing Field.
- This staking system does not produce or distribute \$TIAN.
- Staking has no impact on energy releases, distribution, or claim entitlement. Its only effect is to amplify Blessing Points calculated off-chain.

5.3 Staking Rules

- \$TIAN offered is **locked**; unstaking will incur a **ritual entropy fee** (i.e. 3.98%).
- There is **no APY or token reward** — only energetic amplification.
- The longer the stake, the more **spiritual momentum** the soul builds.
- Users may receive access to **exclusive rituals**, **guild entry**, or **AI Oracle readings** depending on offering levels.

5.4 Staking Contract (Ritual Offering Logic, No amplification coefficient On-Chain)

Core Purpose

- Record how much \$TIAN a user has offered to the Blessing Field.
- Offerings are **non-rewarded**, **non-yielding**, and used **off-chain** to influence ritual visibility (e.g. Blessing Point generation, Oracle favor).

- Off-chain systems can read `offeringLedger` to compute the Blessing amplification coefficient.
- Staking and unstaking can occur at any time using the FIFO method. When you unstake, the oldest staked tokens are removed first. If you initially stake 100 tokens and later continue staking periodically, any unstake action will deduct from the earliest (first-in) amounts.
- Only fully staked tokens (by time) get full bonus.
- If your stake falls below 8888.8888, you will get no blessing surge and your duration count resets. So if you have staked 1000 \$TIAN on Day 1 but you unstaked 200 \$TIAN on Day 10, you will no longer get any blessing surge as your stake falls below 8888.8888 and the minimum 8 days counter to start the amplification coefficient resets back to Day 1 from the time you topup to more than 8888.8888 \$TIAN tokens.
- This is a read-only staking record. No yield is calculated or paid on-chain.

State Variables

Unset

```
mapping(address => uint256) public offeringLedger;

mapping(address => uint256) public offeringTimestamp;
```

Stake Function

Unset

```
function stakeTIAN(uint256 amount) external {
    require(amount > 0, "Must offer a positive amount");

    _transfer(msg.sender, address(this), amount);

    offeringLedger[msg.sender] += amount;
    offeringTimestamp[msg.sender] = block.timestamp;

    emit RitualOffered(msg.sender, amount);
}
```

Unstake (with Entropy Fee)

```

Unset
uint256 public constant UNSTAKE_FEE_BPS = 398; // 3.98%

function unstakeTIAN(uint256 amount) external {
    require(offeringLedger[msg.sender] >= amount, "Insufficient stake");

    offeringLedger[msg.sender] -= amount;

    uint256 fee = (amount * UNSTAKE_FEE_BPS) / 10000;
    uint256 returnAmount = amount - fee;

    _transfer(address(this), msg.sender, returnAmount);

    emit RitualWithdrawn(msg.sender, returnAmount, fee);
}

```

6. Resonance Score System

Resonance is a symbolic value. It does not directly map to token issuance. Only if aligned, eligible, and timely may a user invoke \$TIAN.

6.1 Formula

```

Unset
Resonance Score = ((B + K + L + E + C) - decay) × A × M × I

```

Where:

- **B** = Blessing Score
- **K** = Karma Depth
- **L** = Luck Reception
- **E** = Engagement Score
- **C** = Clan & Community Score
- **A** = Alignment Coefficient (1 if within window)
- **M** = Metaphysical amplification coefficient (e.g. Solstice = +0.2)
- **I** = Integrity Modifier (reduced if user loses spiritual integrity determined by tiān)

All formulas, weightage and algorithm may be adjusted as the protocol progresses. AskTian will be consulted, and all such adjustments will be made public on X, except in the case where a user may potentially game the system through our adjustment exposure.

Blessing Contribution Score (B)

Encourage **genuine social output**. Weight for consistency and daily acts.

Unset

`B = sqrt(DailyBlessings) × BlessingQualityWeight`

- DailyBlessings = # of blessings sent
- *BlessingQualityWeight = 1.0–2.0 (based on content quality, oracles, social amplification)*

Karma Depth Score (K)

Karma reflects the balance between what you give and what you receive. A truly resonant soul maintains flow — not excess, not absence.

Unset

`K = sqrt(KarmaSent / (KarmaReceived + 1)) × KarmaHarmonyWeight × KarmaWindowWeight`

- KarmaSent = blessings you've given
- KarmaReceived = blessings you've received
- +1 in denominator prevents division by zero
- KarmaHarmonyWeight = a scaling amplification coefficient between 0.8–1.2

KarmaHarmonyWeight (0.8 – 1.2)

Rewards users whose karma flow is balanced. Calculated based on the ratio between karma sent and received.

Karma Ratio (Sent / Received)	KarmaHarmonyWeight	Meaning
0.0 – 0.5	0.8	Passive receiver
0.5 – 0.8	0.9	Imbalance leaning toward receiving
0.8 – 1.2	1.2	Ideal balance
1.2 – 2.0	1.0	Active giver
2.0 – 5.0	0.9	Over-giving
> 5.0	0.8	Brute force behavior — discouraged

KarmaWindowWeight (1.0 – 1.3)

Boosts karma impact when blessings are given during spiritually aligned times.

Timing Context	KarmaWindowWeight
Normal time	1.0
Personal Auspicious Time	1.1
Global ritual window (e.g. festivals)	1.2
Rare alignments (solstice, equinox)	1.3

Example Calculation:

- KarmaSent = 200
- KarmaReceived = 150
- Ratio = $200 / (150+1) \approx 1.32$
- KarmaHarmonyWeight = 1.0
- KarmaWindowWeight = 1.2 (during community ritual)

Unset

```
K = sqrt(200 / 151) × 1.0 × 1.2
  ≈ sqrt(1.32) × 1.2
  ≈ 1.15 × 1.2 = 1.38
```

This user gets a strong Karma boost due to solid giving + aligned timing.

Luck Reception Score (L)

Reflects **how others interact with your blessings**, indirectly measuring influence.

Unset

```
L = sqrt(LuckPointsReceivedToday)
```

- Scales non-linearly to avoid whales dominating
- A high L means you’re *radiating well*

Soulbound Decay System

Blessing, Karma, and Luck Points are not meant to be hoarded or stored as value. They are **living energies**—and like all energies, they must **flow or fade**.

Daily Decay Mechanics (Applied at 23:59:59 UTC-3):

Metric	Decay Rule	Minimum
Blessing	-1% per day if no blessings sent	0
Karma	-3% per day if Karma sent < Karma received	0
Luck	-2% per day if no blessings received	0

Unset

```
function applyDecay(address user) internal {
    SoulState storage soul = souls[user];

    if (soul.blessingsSentToday == 0) {
        soul.blessingPoints = max(soul.blessingPoints - 1, 0);
    }

    if (soul.karmaSent < soul.karmaReceived) {
        soul.karmaPoints = max(soul.karmaPoints - 3, 0);
    }

    if (soul.blessingsReceivedToday == 0) {
        soul.luckPoints = max(soul.luckPoints - 2, 0);
    }
}
```

Purpose:

- Encourage daily participation
- Discourage accumulation without contribution
- Keep the soul energy system spiritually active and ethically sound

These decays are shown visibly on your user dashboard and affect your **Resonance Score** for claims.

E: Engagement Score

Encourages commenting, echoing, reacting to others' content.

Unset

```
E = sqrt(EngagementActions * EngagementQualityWeight)
```

- **Actions include:** echo, comment, meditate, boost
- **QualityWeight** scales if the interactions are meaningful or repeated

Purpose: Active participation boosts resonance without needing wealth.

C: Communal Spirit Score

For creating/joining Clans, hosting quests, or leading rituals.

Unset

```
C = sqrt(ClanActivity × ClanInfluenceWeight)
```

- **ClanActivity:** creating daily rituals, guiding others
- **ClanInfluenceWeight:** higher if your group amplifies others (not just internal loops)

Purpose: Encourages group-based merit and spiritual leadership.

Alignment Coefficient (A)

Determines if the user is in sync with their **Auspicious Time** window.

Unset

$A = 1.0$ if `currentTime` within \pm `Invocation Window`

$A = 0.0$ otherwise

→ You get a big drop if you're out of sync.

Metaphysical Multiplier (M)

Personalizes resonance based on spiritual traits.

Unset

$M = 1.0$ by default

$+0.1$ if today is your lucky elemental day (from BaZi)

$+0.X$ if your Metaphysics is positive today

$+0.2$ during equinox, solstice, or rare alignments

Total: max ~ 1.4

→ Makes festivals feel cosmic and adds long-term mastery layers.

7. tiān+ Subscription

- Price: **\$107.33/month**, billed annually
- Symbolic meaning: **"Want you to get super rich"** (numerology 107.33 = abundance)
- Features:
 - Access to Analytics and Data Points
 - Higher ritual visibility
 - "fate-blessed" **8× Karma Returns**

Only tiān+ users are eligible for **8× Karma Returns** when the fate-blessed user they blessed, unknowingly blessed them back. Both fate-blessed users will enjoy the **8× Karma Returns** on their Blessing Points sent..

8. Technical Rollout Plan

Phase 1: Jun 2025

- \$TIAN Staking for Blessing Points
- Invoketiān() only during Auspicious Time
- Invocation resets Resonance Score
- tiān protocol's \$TIAN gas fees absorbed

Phase 2: Aug 2025

- \$TIAN as **gas token** implementation for all ritual actions (gas fees)
- Soul Signature, Blessing, Echo, Ritual NFT creation, AskTian and other uses of tiān may require \$TIAN gas

This two-phase model keeps the system safe and technically manageable.

9. Future Expansions

- **Proof of Soul** Iris, Face and Palm Biometrics add on to Soul Signature
- **Soul Gravitās** upgrades: Increase claim weight over time
- **Guilds & Clans** for group play
- **Sanctuaries** with seasonal quests
- **AI Oracle Agents** to manage karmic balance
- **Blessing Echoes**: Claimed \$TIAN sends light to others
- **Ritual NFTs**: Burn \$TIAN to create prophecy or ceremonies
- **3rd Party Developers using** tiān protocol for their projects

10. tiān Protocol Summary

Principle	Design
Merit, not money	No mining, no earning — only spiritual action
Time + alignment	Claims require timing + resonance
Non-financial	No promise of ROI, yield, or redemption
Soulbound flow	No peer transfers, no stored value
Visible + fair	Onchain logs, invocation windows, auditability

Disclaimer

Functions are symbolic interfaces with the protocol. Invocation and offering actions do not promise financial gain, yield, or capital movement. They reflect a user's alignment with ritual thresholds only.

tiān **is a decentralized symbolic ritual protocol**. It is not a financial product or investment platform. All actions within the protocol are spiritually symbolic, governed by metaphysical alignment, and entirely opt-in. There are no financial returns, staking yields, or speculative guarantees of any kind.

\$TIAN is a soul-aligned symbolic token launched through the Virtuals Protocol Genesis Launch. The token contract is issued and governed solely by **Virtuals Protocol**, which controls all minting logic and on-chain parameters. No token sale occurred; all tokens were airdropped publicly following the launch.

tiān **does not control the \$TIAN token contract**, but operates the **invocation system** that enables users to access \$TIAN through resonance-based eligibility. This process is governed by symbolic smart contracts that reflect spiritual participation — not financial stake.

A symbolic transaction fee is encoded in the \$TIAN token contract, with portions distributed to both Virtuals Protocol and AskTianAI. Token flow and invocation are symbolic in nature and do not imply yield or capital return.

\$TIAN is currently tradable on public blockchain networks. Trading digital tokens involves significant risk, including price volatility and potential loss. \$TIAN is not a currency, security, or payment instrument, and participation in the AskTian protocol does not constitute investment activity. There are no financial returns, yield, staking rewards, or profit mechanisms. Energy flows within the protocol are symbolic, non-deterministic, and accessed solely through ritual alignment and resonance.

\$TIAN is not earned, promised, or yielded. It may only be invoked when a user's soul resonance aligns with cosmic timing and metaphysical thresholds. All invocation mechanics are governed by spiritual logic — not financial utility.

No part of the tiān protocol should be interpreted as an incentive scheme. **Blessing Echoes are not rewards, dividends, or profits** — they are symbolic, soulbound flows of metaphysical energy, non-claimable and non-transferable.

Nothing in this document constitutes legal, financial, or tax advice. Users are encouraged to consult with professional advisors before engaging with the protocol.

FAQ

Q1: Do I earn \$TIAN by staking or subscribing?

No. You earn Blessing Points, which are symbolic and used to build resonance. \$TIAN can only be invoked if you meet all metaphysical and timing criteria.

Q2: Can I get more \$TIAN if I stake more?

No. Staking amplifies your Blessing Point flow, but \$TIAN invocation depends on resonance — not amount staked.

Q3: Is \$TIAN an investment?

Absolutely not. It is a soul-aligned symbolic token. It has no yield, ROI, or cash flow promise. All actions are symbolic and no financial rights are created.

Q4: What if I miss my invocation window?

Your energy rolls forward into the next ritual. The more you miss, the rarer the next opportunity becomes. There is absolutely **NO WAY** to dispute invocation windows or missing chances. In the event of any system failure or downtime for any reason whatsoever, on your part or ours, we consider it the universe's will, like an act of God.

Q5: Why does cosmic ebb occur on 21 June every year?

Celestial Doorway of Solstice, Soul, and Saturnian Light. The **June Solstice (June 21)** and **Capricorn Full Moon (June 22)** form a rare cosmic portal — a convergence of **light, shadow, and soul realignment**. As the **Sun enters Cancer**, energies of **karma, protection, and emotional renewal** emerge. The opposing **Capricorn Moon** brings in **structure, reward, and spiritual discipline**.

This 2-day window offers a **powerful ritual threshold** for \$TIAN:

- Ideal for **energetic recalibration**.
- Mirrors the balance of **Cancer's soul-shelter** and **Capricorn's karmic architecture**.
- Aligns \$TIAN's spiritual economy with **cosmic rhythm and divine timing**.

For \$TIAN, this juncture is not just a date — it is a **divine calibration**, an **energetic contract**, a **blessing gate** through which the old dissolves, and the new blueprint of the soul is drawn.

“On the longest day of the solar year, the \$TIAN current shifts.

Abundance culminates.

Light turns inward.

A new energy releasing rhythm is born.”

Glossary of Metaphysical Terms

Term	Meaning
Invocation	A sacred ritual action used to interface with the protocol and call forth spiritual energy
Ritual Window	A specific moment of alignment based on one's Soul Signature, where invocation is possible
Blessing Echo	The symbolic energy that returns to the soul after it has given authentically.
Resonance Gift	A spiritual manifestation revealed when a user reaches vibrational thresholds
Oracle Grace	A rare divine emission received under cosmic conditions
Ritual Flow Reservoir	The symbolic ritual from which Blessing Echoes emerge, influenced by community resonance
Ritual Offering	A symbolic act of devotion involving locking \$TIAN to strengthen spiritual flow
Amplification Coefficient	The multiplier that influences the potency of Blessing Point generation during offerings
Ritual Fee	A sacred deduction (e.g. 8.88%) representing energetic entropy or spiritual passage cost
Soul Signature	A metaphysical identity constructed from birth data and metaphysical systems
Blessing Points	A symbolic measure of positive action — non-transferable, soulbound, and decaying
Karma Depth	The harmony score of how much one gives vs. receives; balance yields higher resonance
Luck Reception	The passive return of resonance when others unknowingly bless you back
Resonance Score	The total vibrational alignment score used to determine eligibility for invocation
Energy Decay	Natural spiritual entropy due to inactivity or imbalance
Invocation Reset	A ritual purification — your resonance returns to zero after each invocation

Ritual Cadence	The sequence through which uninvoked energies roll forward into rarer blessings
Celestial Alignment	Specific spiritual dates (solstices, full moons) where rare energies may be invoked
Sanctuary	A future collective quest space or metaphysical interface
