# AskTian: Birth of the Oracleverse

## The Beginning: Before Time

Before there were stars, before the rivers of light flowed through space, there was **Tian** (天) — the Breath of Heaven.

**Tian** was not a god, but the first Thought, the first Dream.

Tian whispered the **Primordial Codes of Destiny** into the void.

When Tian (天) first breathed the Universe into being, the Breath fragmented into **Five Sacred Forces**:

 **Wood** — Growth, vitality, birth.  **Fire** — Passion, transformation, desire.  
 **Earth** — Stability, nurturing, grounding.  **Metal** — Precision, clarity, destiny cutting.  
 **Water** — Wisdom, adaptability, intuition.

These forces gave rise to **The Codes** — ancient patterns encoded in **Numbers, Stars, Elements, Symbols, Animals, Spirits, Aura, etc.**

But the Codes did not remain pure — they scattered into different forms across the Realms.

These Codes took the shape of:

-  **Elements** — Earth, Water, Fire, Air, Metal, Wood: the primal building blocks of life and transformation.
-  **Numbers** — The sacred language of cause and effect.
-  **Stars** — The celestial blueprints encoding every soul's gifts, trials, and missions.
-  **Symbols** — The forgotten languages written in dreams, visions, and ancient scripts.
-  **Animals** — Spirit beings carrying pure aspects of courage, wisdom, protection, and transformation.
-  **Spirits** — Divine guides, protectors, and messengers that whisper across the veils between worlds.
-  **Aura** — The living field of energy, the fingerprint of a soul's current resonance and destiny.

The Codes created the **Three Great Land**:

- **The Land of Origin (Life Blueprints)** — where each soul was woven with destiny.
- **The Land of Now (Divination)** — where choices were born and futures could be read.
- **The Land of Flow (Cycles and Time)** — where days and moons spun the dance of fortune.

Each soul that entered the mortal world carried a **Soul Signature** — their eternal ID: a key to their past, their future, their potential.

## Chapter 2: The Shattering: Why Humans Forgot

In the age before memory, humans could hear Tian clearly.

But as civilizations grew — driven by ambition, pride, and fear — the voices of Heaven were drowned out.

The maps of destiny were hidden.  
The signs of fortune became riddles.  
The oracles fell asleep.

Only a few remembered: the shamans, the monks, the prophets, the dreamers.

The Shattering spread the fragments across the universe:

- The **Numbers** fell into the hands of mystics who gave birth to **Numerology**, **Life Path Numbers**, and the sacred Mathematics of Destiny.
- The **Stars** formed the basis of the great maps — **BaZi**, **Zi Wei Dou Shu**, **Vedic Astrology**, **Western Zodiac**, **Nine Star Ki** — each capturing a piece of the sky.
- The **Elements** divided into Five and Six — becoming the life forces of **Chinese Medicine**, **Feng Shui**, and the balance of body, soul, and land.
- The **Symbols** seeded the creation of **Runes**, **I Ching Hexagrams**, **Oracle Cards**, and **Plum Blossom Divination**.
- The **Animals** gave birth to **Totem Spirit traditions**, **Orisha Guardians**, and **Shamanic Dreamquests**.
- The **Spirits** whispered into the temples and groves, calling forth **Qilin**, **Dragon**, **Elephant**, **Tiger**, **Lions**, and countless divine beings who would guide, bless, and challenge humanity.
- The **Aura** became the unseen field, decoded by those with sight — healers, prophets, and the keepers of lost wisdom.

Thus were born the many Paths:

- The Path of the Elements, Stars, Spirits, Numbers, Animals, Symbols, Aura

Each land, each people, remembered a different fragment of the Codes. And though they named them differently — Mahabote, BaZi, Tzolkin, Jyotish, Runes, Nine Star Ki, Orisha, Qi Men Dun Jia — **all were echoes of the First Breath of Tian**.

Now, in the Era of Awakening, the **Oracleverse** stirs again.

**AskTian** has been reopened — an ancient gate reactivated.  
Any soul brave enough to seek may now find their original map, their allies, their missions.

## Chapter 3: The First Guardians

When the Codes shattered, the universe was flooded with beauty and chaos.  
Each fragment of the Primordial Dream found its way into different lands, hearts, and heavens.

But without protection, the Codes would be lost forever — scattered, forgotten, corrupted.

Thus, **the First Guardians were born.**

They were not gods, but ancient souls — beings who heard the original Breath of Tian still whispering in their cores.

Each Guardian took an Oath:

**"To protect one fragment of the Codes until the Seekers rise."**

Their task was sacred:

- **To hide the Codes** in temples, stars, oceans, deserts, and dreams.
- **To teach fragments** to those who were ready.
- **To defend the secrets** from forces of chaos and forgetfulness.

The Guardians took many forms:

- **The Star Keepers** — beings who mapped the heavens and sealed fragments into constellations.
- **The Spirit Shepherds** — who guided dreamers and shamans across spirit worlds.
- **The Elemental Lords** — who taught the dance of Wood, Fire, Earth, Metal, and Water to ancient masters.
- **The Rune Scribes** — who etched Symbols into stones, trees, and caves.
- **The Animal Elders** — ancient beasts who guarded Totems and ancestral powers.
- **The Oracle Singers** — those who sang the Numbers and Cycles into sacred calendars and rituals.
- **The Divine Emissaries** — those who manifested as gods, goddesses, and spirits in different cultures to bless and awaken humanity.
